Eligible to work in the U.S. under TN status

Skills and Qualifications

Programming Languages: C, C++, Java, JavaScript, Swift, Erlang, Python, HTML, CSS, Node.js, AWS

Languages Spoken: French, English, Arabic

Education

Concordia University – Montreal, QC, Bachelor of Computer Science (Co-op)

Sept 2022 – Sept 2027

- **Key Courses:** Object-Oriented Programming I & II, Web Development, Data Structures and Algorithms, Programming Principles

Professional Experience

Airbus – Software Engineer, Data Intelligence Intern

Sept 2026 – Dec 2026

Mirabel, QC

- Partnered directly with business stakeholders to gather requirements and translate their needs into structured data solutions
- Built and maintained data pipelines and ontology objects within Palantir Skywise, transforming raw operational data into actionable, decision-ready datasets for cross-functional teams
- Cleaned, validated, and quality-checked large-scale datasets, fixing inconsistencies to improve data integrity and downstream reporting accuracy
- **Technologies used:** Palantir Skywise, Python, SQL, data pipelines, stakeholder requirements gathering

Canadian Food Inspection Agency (CFIA) – Application Tester Intern

Oct 2025 – Apr 2026

Montreal, QC

- Conducted functional, automation, and regression testing on internal federal applications on over 1000+ test cases improving end user stability and reducing defects
- Prepared detailed bug reports and collaborated with developers to ensure compliance with specifications
- Contributed to implementing automated testing tools and improving CI/CD processes
- **Technologies used:** Manual testing tools, Test cases & test plans, Microsoft D365, Government internal web applications

Soulco CodeCraft – Full-Stack Developer Intern

Jun 2025 – Aug 2025

Remote — Belgium

- Worked with Angular 17 and Spring Boot 3 in an Agile Scrum environment delivering weekly feature increments and resolving sprint backlog items.
- Participated in designing and developing an e-commerce web application.
- Integrated APIs, managed databases, and followed software engineering best practices.
- **Technologies used:** Selenium, Python, Jira, Git, Azure DevOps.

Projects

Othello Game – Java OOP

Jun 2024

| GitHub

- Designed UML architecture with classes Game, Board, Position, Piece, and Player.
- Implemented core logic, piece flipping, and winning conditions.
- **Technologies used:** Java

Digital Library – Java OOP

Apr 2024

| GitHub

- Managed binary files, exceptions, inheritance, and object-oriented design.
- **Technologies used:** Java

Adaptive Priority Queue – Java

Apr 2025

| GitHub

- Efficient priority queue implementation using Min-Heap and HashMap.
- Optimized for Dijkstra's algorithm and real-time scheduling.
- **Technologies used:** Java

Certifications

Palantir Foundry Data Engineer Associate – Palantir Technologies

Sep 2026 - 2028

- Covered core Foundry data engineering concepts, including pipeline building, data transformation, and ontology modeling.
- Certification valid through Sep 2028.
